

## Installation manual FleetGO plug & play Dongel

### Start

This is the installation manual for the FleetGO plug & play Dongel. Before you start, you'll need the following:

- FleetGO account
- FleetGO plug & play Dongel
- OBD extension cable
- A vehicle that has an OBD2 port

You will need to enter the following data onto the FleetGO platform once installed:

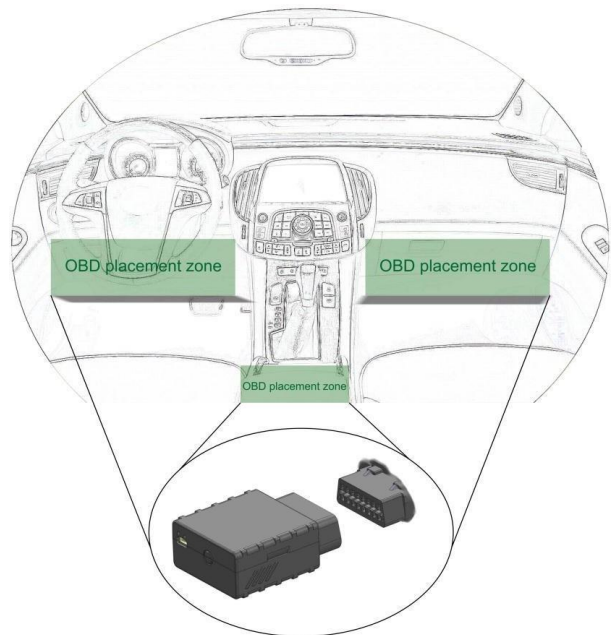

- Brand and vehicle type
- Licence plate
- Current mileage
- Dongel (serial)number

### Insert device

1. Localize the OBD2 port in your vehicle. Your vehicle instruction booklet should tell you where to find it.
2. Place the Dongel or extension cable on the port (should be only one option) and make sure this stays put.
3. When the lights 'status' and 'navigate' flicker, the device is ready to use.

### Connect Dongel to platform

1. Log in on your FleetGO platform ([www.app.fleetgo.com](http://www.app.fleetgo.com)).
2. Navigate to **Management**, to **Common**, to **Dongles/trackers**.
3. Click on the icon (≡) behind the Dongel you're installing (check the serial number) and click **Assign Dongel**.
4. Fill in the vehicle license plate and the current mileage, close with **Save**.
5. Navigate to left and click **Administration**, click on the icon (≡) behind the concerned administration. Click **Edit** and fill in the **Car Brand** and **Car Type**.

### Device testing

1. Start the vehicle and make a short test drive from 2 minutes minimum.
2. Stop the vehicle, ignition off, and login on your Fleetgo platform.
3. Click on **Production** in the menu and go to **Trips**. Select the vehicle from the **Administration** menu.
4. Check if you can find records of the test drive. This should show as following:
